AN Academy management

It is a system used to manage the academy, this software is completely built using Laravel Framework.

It also supports several languages (Arabic and English).

We can explain this arrangement in the Administrator, Teacher, Parent, and Student dashboard

The Admin is able to:

Essential Tabs:

1- CRUD grades

2- CRUD classrooms.
   Meanwhile, a grade has several classrooms.

3- CRUD sections.
   In which, one classroom has abounding sections.

4- CRUD teachers.
   Wherever, once section has many teachers, In contrast a teacher belongs to various sections

5- CRUD Parents.
   We use livewire utterly in this tab

6- CRUD Students.
   The fundamental tab. There are a lot of option we'll talk about it later.
   At the end of the second term, the students must either get promoted or graduated them out of that academy if they were in the last classroom of the last stage

Accounts Tabs:

1- CRUD fees.

We can add a study fees for each classroom with a different fee

For example, we have two classrooms into Primary Stage, so we can add a different charges for each classroom of this stage.

2- CRUD Fees Invoices

After register the student in our school, they will have to pay back his loans whether by installment or lump sum.

3- CRUD Student Receipts

After the student enrolls, there is a specific period of time during which they can get their loans that they paid off before if they want to leave the academy

Additional Tabs:

1- CRUD Subjects

A teacher is able to study several subjects

2- CRUD Quizzes and Questions

The subject teacher can add a mock test, so that the students participate in this test and test their skills

3- CRUD Sessions

The teacher can add a class online, so that students enter through the Zoom application

----

While, into a teacher dashboard:

1- Shows the Sections that he is committed to giving it
2- Add quizzes after lectures
3- On a daily basis, he can take students' attendance and issue a report
4- CRUD Sessions
   The teacher can add online classes on the Zoom application
   For the students so that they attend it.
5- After giving the lecture.
   A teacher uploads lecture files and resources, and students download and read them

----

In a parent dashboard:

1- View the details of his children
2- Filtering the attendance of his children from a specific date to another specific date and presenting it in the form of a report.
3- View invoices for children's fees that have been paid before

----

Finally, a student dashboard consist of:

1- He can enter his tests and then view his grades (failing or passing).

Where his father can see these scores.

2- He downloads and reads all class files that his teachers upload.
